

CHANDRA PRAKASH UPADHYAY

Associate Product Manager | Product Analyst

Bengaluru, India | +91 8303042121 | chandraprakashupadhyay2001@gmail.com | linkedin.com/in/cpupadhyay | github.com/cpupadhyay

SUMMARY

Computer Science graduate who turns messy data into product decisions. At Soroco, analysed 500K+ rows of process data and shipped 3 Power BI dashboards used in weekly product reviews. Since then, built three end to end product cases covering PRDs, funnel diagnosis, RICE prioritisation and live Figma prototypes. Comfortable owning a metric, writing the spec and defending the trade offs.

EXPERIENCE

Soroco | Data Analyst Intern

Apr 2025 - May 2025 | Bengaluru

- Analysed 500K+ rows of workflow data in SQL and Python (Pandas, NumPy) to find where teams lost the most time, and turned it into a prioritised fix list for the product team.
- Built 3 Power BI dashboards on task throughput, feature adoption and error frequency that became the reference view in weekly product reviews.
- Automated the data pull and refresh in Python, cutting a recurring 3 hour reporting cycle to 30 minutes.
- Caught 2 data inconsistencies before a client facing launch by cross checking pipeline output against source logs, stopping wrong adoption numbers from reaching the customer.

PRODUCT PROJECTS

Chorus | AI Multi Model Deliberation Platform | cpupadhyay.github.io

Feb 2026 - Mar 2026

- Shipped a live AI product that routes one query to GPT, Gemini and Claude and synthesises a single reasoned answer, published with the full PRD and Figma flows.
- Set Weekly Active Queries as the North Star Metric, with answer acceptance and repeat query rate as supporting engagement measures.
- Scoped v1 to three high intent use cases after a competitive scan, with guardrails on cost per query and response latency.
- Ran a red teaming pass on model disagreement cases to shape the answer confidence display, and submitted the product to an AI safety fellowship.

DreamJob | Two Sided Hiring Marketplace for Freshers

Jan 2026 - Feb 2026

- Mapped the fresher funnel from search to interview and defined Interview Conversion Rate as the North Star Metric instead of vanity application counts.
- Prioritised the backlog with RICE and JTBD personas, cutting v1 to verified listings, recruiter response SLA and profile strength scoring.
- Delivered a full PRD with success metrics, edge cases and a clickable Figma prototype for both sides of the marketplace.
- Set activation, recruiter reply time and repeat posting as the supporting metric tree under the North Star.

Snapmint | BNPL Trust and Checkout Case Study

Mar 2026

- Traced a 35% BNPL checkout drop off to a trust gap using funnel analysis and three research backed personas.
- Ranked 7 features by RICE with reviews and in flow support as P1, and set Monthly Purchase Completion Rate as the North Star Metric, targeting 3 to 5 percent up to 12 to 15 percent in two quarters.
- Designed 4 Figma wireframes surfacing repayment terms, trust signals and support at the exact points where users abandoned.
- Benchmarked the flow against three BNPL apps to separate real differentiators from table stakes fixes.

EDUCATION

B.Tech, Computer Science and Engineering | Shri Ramswaroop Memorial University, Lucknow

2019 - 2023 | CGPA 7.54

SKILLS

Product: PRD Writing, Funnel Analysis, A/B Testing, Retention and Cohort Metrics, North Star Metric, RICE, MoSCoW, AARRR, JTBD, User Research, Competitive Analysis, Roadmapping

Technical: SQL, Python (Pandas, NumPy), Power BI, Tableau, Advanced Excel, AWS, Data Modelling, Dashboarding

Tools: Figma, Notion, Jira, GitHub, Google Analytics, MS Office

Strengths: Metric ownership, data storytelling, writing clear specs, working across engineering and business teams

CERTIFICATIONS

IBM AI Product Manager Professional Certificate, Coursera | In Progress, expected Aug 2026

Aha! Product Management Professional, LinkedIn Learning | Jan 2026

Data Analytics Professional, PW Skills | Oct 2025
